Golf swing video with your mobile device.

WHY IS **Feedback** THE BEST GOLF TRAINING TECHNOLOGY TO HIT THE MARKET?

Feedback is FLEXIBLE

The flex tripod allows easy positioning to video your golf swing.

It fits almost any smartphone AND the flexible legs bend to attach to golf bags, bag stands on the range, an indoor "net," etc. So now the only question is:
"Where will you use **Feedback** to capture your golf swings?"

Feedback LISTENS

Use a simple voice command to start video capture.

Capture individual swings without the hassle of constantly pressing record on your mobile device. Get the most out of your practice and do it voice-controlled and hands-free.

Feedback is 24/7/365

The mobile and online Clubhouses are always available.

Analyze your swing frame by frame or try our user-friendly drawing tools to check swing plane, alignment and much, much more. Share your swings on social media or send them to your instructor for a quick mobile lesson on the go.

\$89⁹⁹ + Shipping and Handling

*Why is [voice-activated recording] important? Have you ever tried to take a video recording of your golf swing and you gotta' go back and forth from where you're hitting to the phone? Everybody knows that's not a whole lot of fun. You don't have to do that anymore. Just tell it that you're ready and hit and it captures the video. ...Great technology from **Feedback**.*
